Tutorial 1

Introduction to GrowBikeNet · 15 Minutes

Presented the first time at [D3A](#), Nyborg, Oct 8th 2026.

Using GrowBikeNet v0.14.5

Created 2026-09-30 by Michael Szell: contact@bikenetkit.org

Prerequisites

- You have [conda](#) installed (or the faster [mamba](#)).
- You have a UNIX/Mac-based terminal.

Setup

First, download and unzip the `tutorial01` folder:

👉 <https://tinyurl.com/d3abikenetkit> 👉

Then use the terminal to navigate to this folder.

Install python, growbikenet, and fixbikenet via:

```
conda env create --file environment.yml
```

Then, activate the environment via:

```
conda activate bikenetkit_tutorials
```

and run jupyter lab:

```
jupyter lab tutorial01.ipynb
```

Now, a browser window with the tutorial should open.
